

Installing your new Elise/Exige exhaust hole cover-plate from Diffflow.

Directions:

- 1)** Remove your existing diffuser and also remove the screws/nuts that are attached to the Cover plate.
- 2)** Place the Diffflow cover-plate on the upper side of the diffuser so it covers the hole.
- 3)** Take a 3/8 size drill bit and drill 2 holes in your diffuser where the 2 holes are on the cover-plate.
- 4)** Fasten the cover-plate to the diffuser with the nuts and bolts provided. Flex and bend it to fit right.
- 5)** Next you will want to re-attach your diffuser.
- 6)** You will thread the rear middle screw from your diffuser through the cover-plate rear hole. The rear panel of your Lotus and diffuser will tighten down against the cover plates rear clip. Now your cover plate should be secure.

More advanced users can pop-rivet the cover plate on. You can also use Velcro if you plan on removing it in the future.
