

Installing your new Lotus Evora diffuser.

Directions:

- 1) Remove your existing diffuser by unfastening all of the screws and saving all of them.
- 2) Remove the 2 rear grills from the stock diffuser. These will need to be re-bolted on to the new diffuser.
- 3) Now, install the Diffflow diffuser. Use the screws and nuts that you just took off from your old diffuser.

Disclaimer:

THE PURCHASER IS RESPONSIBLE FOR DETERMINING THE SUITABILITY OF ANY AND ALL PRODUCTS PURCHASED. FOR OFF-ROAD USE ONLY. Purchaser understands and recognizes that off road and racing equipment and services provided by manufactured and/or sold by Distributor are subject to varied conditions due to the manner in which they are to be installed and used. Purchaser further recognizes and agrees that suitability of any part sold or manufactured for a particular application is the purchaser's decision and that the purchaser is not relying on the skill or judgment of manufactured and/or Distributor regarding suitability of any product or service. Manufacturer and Distributor make no warranties whatsoever, expressed or implied, oral or written to purchasers with regard to off road and racing equipment. The right to make changes in design or add to or improve on product without incurring any obligations to install the same on products previously manufactured is expressly reserved. Buyer agrees to indemnify and hold seller harmless from any claim, action or demand arising out of or incident to the buyer's installation or use of products purchased from Manufacturer and/or Distributor (Diffflow, LLC). All of our parts are aftermarket replacement parts. Part numbers are used for reference only. No implication is made that these parts are the original car manufacturer's, are from the original suppliers, or are approved by them. Before operating vehicle, always wear a seat-belt.
